Group 5 – Almanac

Addison Broschell, Arianna Wallace, Harveen Harveen, Leo Goebel, and Aithan McIntyre

Our Meridian Subsystem

- Were responsible for the reporting and exporting subsystem.
- Our focus is the whole system
- Our language used is python
- The subsystem turns stored forecasts into the fixed-format reports and exports agronomists depend on.

Team Charter

- Evenly distribute tasks
- We will have constant communication, in-person meetings
- We give tasks according to induvial strengths
- For decisions we will vote and converse within the group before going through to the final decision.
- We will only submit once each group member says its good to go
- We will practice as a group before presenting
- We will document our code and use similar coding practice to preserve cohesion and understanding
- We will always work on a separate branch before pushing to main

Agent Protocol

- We will mainly be using copilot
- As a secondary agent we may use Google Gemini

What we will delegate to AI

- Explaining unfamiliar code
- Helping with repetitive code
- Building test cases
- Explaining and debugging errors

THANK YOU FOR LISTENING
